EXPERIENCE

Epic Games — *Engine Programmer Intern (Horde CI Frontend)*

MAY 2025 - SEPTEMBER 2025

Worked closely with stakeholders to identify their needs, and owned and developed a new build temperature gauge feature to indicate the stability of projects.

Proactively led a cleanup effort to improve React and TypeScript code organization and documentation, standardize practices across the project, and streamline developer onboarding.

Contributed to large-scale codebases in collaboration with frontend, backend, and QA engineers.

Yesteryear Games — *Co-founder, Web Developer*

SEPTEMBER 2023 - AUGUST 2024

Designed and developed a website using HTML, Tailwind, and JavaScript with a focus on responsive design.

Crafted a Steam page with research-backed design decisions and custom assets, driving a 25% lifetime click-through rate after 10 months.

PROJECTS

echoes — *Lead Web Developer*

MARCH 2024 - MAY 2025

Directed a small team of new web developers to design and deliver a multi-page SvelteKit website.

Utilized Google Apps Scripting to create an easy spreadsheet-to-JSON data pipeline for updating website information.

ThenToMeet — *Personal Project*

AUGUST 2024 - SEPTEMBER 2024

Developed and delivered a performant SPA using SvelteKit and TypeScript to identify scheduling overlaps between participants of existing [When2meet](#) events, streamlining coordination for medium-sized project teams. Still sees regular users.

EDUCATION

Rochester Institute of Technology — *BS/MS in Game Design & Development*

AUGUST 2021 - MAY 2025

Completed a BS and MS in Game Design and Development via RIT's Combined Accelerated Bachelor's/Master's Degree program.

HARD SKILLS

React
Svelte
TypeScript
JavaScript
MobX
Tailwind
Jira
Git
Perforce
Vercel
UI/UX
Unity
C#
Math

SOFT SKILLS

Leadership
Collaboration
Communication
Active Listening
Agile Principles
